## Does service-learning work?

Service-learning is an idea that simply makes sense to many educators and community members. Anecdotal evidence points strongly to the value of service-learning efforts (several stories are collected in *Service-Learning in Action: Voices From the Field*, Education Commission of the States, 1999). But is there research to back it up? The research on service-learning (Brandeis, 1998; Hedin and Conrad, 1990) shows that students who take part in service-learning strengthen their academic and citizenship skills and their civic attitudes. In addition, there is evidence that service-learning provides the key experiences that lead to resiliency (Sagor, 1996) and help develop a sense of social responsibility (Berman, 1997).
